DECKING POSSIBILITIES

Decking is a popular addition to compliment your wooden pool.

10 YEAR WARRANTY

*Plastica have sourced reliable quality wood from the global supply chain.
We precision cut and pressure treat it to the optimum standard.*

All the structural wood is treated with TANALITH E Extra. This pressure treated timber is wood that has been impregnated with TANALITH E wood preservative in controlled conditions of a vacuum pressure impregnation plant. It is protected against fungal rot and insect attack to ensure a long service life. The grade of preservative used on the Plastica Wooden Pools also has built-in water repellency.

SELF-BUILD KIT

*From dream
to reality!*

Complete with everything you need to construct and enjoy your own swimming pool (except the concrete base to put it on and, of course, the water) you can be swimming in **your own pool in a matter of days.**

With a few basic hand tools such as a hammer, hacksaw, cross head screwdriver, drill and trimming knife, you can build your pool in nine easy stages. Step by step instructions are included in the kit.

Stage 2
Lay concrete

Stage 5
Fit underlay and cut in pool fittings

Stage 6
Liner fitted ready for filling

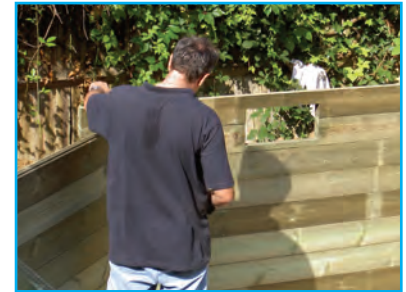

Stage 1
Concrete base

Stage 2
Layout and square first timber layers

Stage 3
Building walls to correct height

Stage 4
Finished wooden shell

Stage 5
Filling

Stage 7
Top rail and internal ladder fitted

Stage 8
Filter package connected to pool
